SUMMARY

Software Engineer at Orange Business with hands-on experience in backend development, DevOps and observability. I build Go services and Grafana plugins for CDN, DNS, WAAP and FastEdge platforms. Previously a Full Stack & DevOps Intern at Orange Innovation, building RESTful services with Java, Spring Boot and Docker. Also served as a Teaching Assistant at Nile University, mentoring students in Git and Agile practices. Committed to writing clean, reliable and scalable software.

EXPERIENCE

Software Engineer · **Orange Business** — Jul 2025 – Present

- Develop CDN, DNS, WAAP and FastEdge plugins for Grafana, extending observability for internal teams.
- Build backend components in Go, using Gorm for database access.
- Contribute to design reviews and end-to-end project delivery within the engineering team.

Full Stack & DevOps Intern · **Orange Innovation** — Jul 2024 – Jul 2025

- Built RESTful services with Java, Spring Framework and Hibernate ORM.
- Containerized applications with Docker and worked daily in Linux command-line environments.
- Applied design patterns and secure coding practices, including SQL injection prevention.
- Delivered features in Agile Scrum sprints using Git-based workflows.

Software Engineering Teaching Assistant · **Nile University** — Sep 2024 – Jan 2025

- Taught Git and GitHub workflows to undergraduate students.
- Led sessions on Agile, Waterfall and project management methodologies.
- Mentored student teams through hands-on software engineering projects.

C/C++ Intern · **Orange Innovation** — Aug 2022 – Sep 2022

- Solved algorithmic and data-structure problems in C++.
- Applied object-oriented C++ to build efficient, maintainable programs.

PROJECTS

Derma Assist — AI Skincare Mobile App — Graduation Project

- AI-powered mobile app that uses facial analysis to detect early signs of skin conditions and give personalized skincare insights.

Real-Time Chat Application — Python, MySQL — Nile University

- Secure real-time chat app with user authentication and private messaging.

SKILLS

Languages	Go, Java, Python
Frontend	HTML, CSS, JavaScript
Databases	MySQL, MongoDB
DevOps & Tools	Docker, Linux, Git, GitHub, GitLab
Monitoring	Grafana, Prometheus
Testing	Postman, GoogleTest
Practices	Agile Scrum, Design Patterns, OOP, Data Structures & Algorithms

LANGUAGES

Arabic — Native | **English** — Advanced | **French** — Beginner
